Weather Key Points

Regional Operations Center

Western Region

Friday, June 24

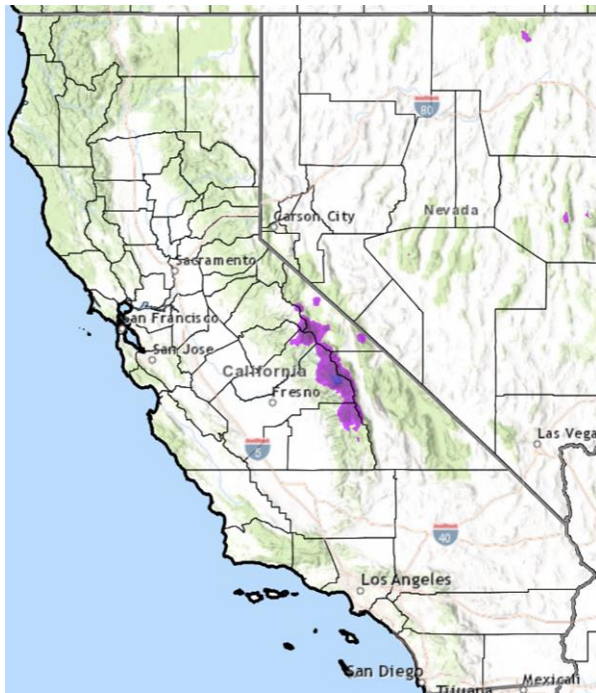

- Moderate heat risk impacts will persist across much of the state through the weekend as hot temperatures continue, with readings gradually seeing a cooling trend toward the middle of next week
 - Afternoon high temperatures of 100 to 107 will be common across the Central Valley, with even hotter readings across the southern deserts (approaching 120 degrees for Death Valley)
 - Temperatures will also warm well into the 80s and 90s closer to the coast and even across the far northern California mountain valleys through Monday
 - Overnight low temperatures will fall into the 50s and 60s north and lower 70s south, providing relief from the heat impacts
- Breezy winds will also be persistent across the mountains and foothills most afternoons over the next 7 days, bringing more periods of locally elevated fire weather conditions, especially across Southern Region
 - At this time, widespread critical fire weather conditions are not expected
- Scattered afternoon showers and thunderstorms will also be noted across mainly the northern and central Sierra through Saturday
 - Widespread significant rainfall is not expected, but heavier bursts of rain near any thunderstorms could bring some localized burn scar impacts
 - Any storms could bring gusty winds and small hail as well
